👤 About Me

I am an honours Geoinformatics student at Stellenbosch University specializing in spatial risk modeling and environmental criminology. I am proficient in Python, SAR processing, and Full-Stack development. I have experience in urban stakeholder engagement, having secured granular datasets through direct coordination with VISPOL, SAPS, and the Stellenbosch Municipality.

📁 Work Experience

Student Assistant (GIT 312 & GIT 214)

Stellenbosch University

02/2026 | Stellenbosch

Feb 2026 – Present Providing technical guidance to undergraduate students during practical GIS sessions. Troubleshooting software errors and marking assignments for final year and 2nd year GIT modules.

Student Assistant (GIT 242)

Kyle Loggenberg

08/2025 – 11/2025

- Helping the students in the practical sessions.
- Fixing errors the students may have made and orthoengine / Catalyst program glitches.
- Marking practicals and assignments

Digitizing for Masters Project

Jurgen Koegelenberg

07/2024 – 07/2025

- Digitized urban and rural road networks for over 120 hours for a Master's level research project.
- Utilized ArcGIS Pro software to clean and organize large spatial datasets.

Elvito | Business Owner

04/2023 – 09/2025 | Stellenbosch

- Introduced innovative 360-degree virtual tour solutions tailored for the hospitality industry, boosting client bookings by over 30%.
- Implemented cost-saving strategies resulting in a 20% reduction in client operational expenses.
- Integrated advanced geoinformatics principles and educational insights to align business strategies with technical expertise.

Comic Market Business

Self Employed

01/2018 – Present | Cape Town

- Managed a comic and memorabilia business since age 14, handling sales, communication, recommendations, and daily transactions.
- Developed strong negotiation and problem-solving skills in a fast-paced retail environment.

Leadership Positions

GIT Representative & Coordinator

Geoformal Dance Committee

01/2026 – Present | Stellenbosch

- Selected to represent the Geoinformatics department in a collaborative committee alongside Geography and Earth Science departments.
- Managed inter-departmental expansion and coordinated logistics for a large-scale student event.
- Successfully secured event funding and handled sponsorship requests to ensure financial viability.

Student Mentor

Capri

01/2024 – 12/2024 | Stellenbosch

- Facilitated the seamless integration of incoming first-year students into university life during Orientation Week by providing comprehensive peer-led academic and social support.
- Applied established leadership and mentorship experience to guide a cohort of new students, ensuring a compassionate and inclusive transition into the university environment.
- Leveraged strong interpersonal skills to mentor individuals through the academic challenges and social adjustments of their first year.

Scout Leader

1st Bergvliet Sea Scouts

02/2019 – 09/2022

- Managed a patrol of seven individuals and scribed minutes for leadership meetings.
- Achieved second place overall out of 8 teams for 2021 and 2022.
- Assisted in the organization and running of 50+ people camping trips

Life Philosophy

*"The important thing is not to stop questioning.
Curiosity has its own reason for existence."*

Education

BSs Hons Geoinformatics

Stellenbosch University

2026 – Present

Bsc Geoinformatics

Stellenbosch University

2023 – 2026

Matric

Westerford High School

2018 – 2022

- Achieved a Bachelors pass in Matric

Certificates

SUN Data Science Workshop

- Data Visualization: Developed advanced spatial and non-spatial charts to communicate complex datasets.
- Data Manipulation: Streamlined analysis workflows by grouping and structuring data in Python.
- Analytical Reporting: Transformed raw data into actionable insights using Python libraries.

Deep Learning and Computer Vision | Udemy

- AI Detection: Built real-time object tracking systems for deployment on NVIDIA Jetson Nano hardware.
- GANs: Utilized Generative Adversarial Networks for image creation and training dataset augmentation.
- Deep Learning: Engineered CNNs for automated image classification and complex spatial feature extraction.

Web Development Bootcamp | London App Brewery

- Full-Stack: Built responsive web applications using React, JavaScript, HTML, and CSS.
- Backend: Managed server-side logic and databases for geospatial web integration.
- SDLC: Managed development from Figma UI/UX to real-time hardware deployment.
- Integration: Developed React Admin interfaces to streamline data management and project tracking.

Python Pro Bootcamp | London App Brewery

- Core Programming: Mastered OOP, loops, and GUIs to build robust, automated software solutions.
- Data Scraping: Integrated RESTful APIs and web scraping for efficient, automated data retrieval.
- Data Engineering: Utilized Pandas and NumPy for large-scale dataset analysis and transformation.
